

# You know best.

# Know EARLY.

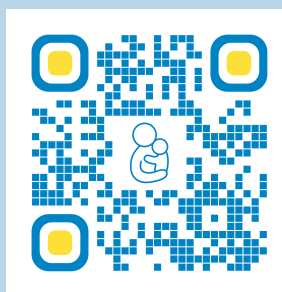

You know your baby best. If you are worried that your child is not reaching important developmental milestones, like crawling, babbling, or smiling by a certain age, it's best to **know EARLY**.

Don't wait to find out if your baby is on track in their physical growth, brain development, social-emotional skills, and in meeting other important milestones.

*It's never too early to call  
Alabama's Early Intervention System.*
