

You know best. Know EARLY!

If you are worried that your child or a child in your care is not reaching important developmental milestones, like crawling, babbling, or smiling by a certain age, it's best to **know EARLY**.

Early Intervention works with families with children birth to 3 who may have developmental delays or disabilities. To give a child the best start in life, it's **never too EARLY** for Early Intervention.

Anyone can make a referral.
